

Salamander

Spider

BabyDragon

Bat

DragonPirate

Animal

```
classDiagram
    Animal <|-- Salamander
    Animal <|-- Spider
    Animal <|-- BabyDragon
    Animal <|-- Bat
    Animal <|-- DragonPirate
```

The diagram illustrates a class hierarchy where the `Animal` class is the superclass. Five subclasses, `Salamander`, `Spider`, `BabyDragon`, `Bat`, and `DragonPirate`, all inherit from `Animal`. This is represented by a horizontal line connecting the five subclasses, with a vertical line and an open downward-pointing triangle arrow leading from the center of this line to the `Animal` class box.
